## L'ambiente bagno ergonomico

An ergonomic bathroom space

**Progettare l'ambiente bagno è importante per renderlo pratico e funzionale sotto tutti i punti di vista, adattando l'arredo agli spazi, scegliendo gli elementi giusti e rispettando le esigenze personali. L'ergonomia della stanza da bagno ne aumenta il comfort e la sicurezza.**

Designing the bathroom space is important for making it practical and functional from all points of view, adapting the furnishings to the spaces, choosing the right pieces and respecting personal needs. Bathroom ergonomics increase its comfort and safety.

### Quali sono le distanze minime?

What are the minimum distances?

Per un comodo utilizzo della stanza da bagno sono state identificate delle misure standard. Il lavabo ha una larghezza che si aggira intorno ai 60 cm e una profondità di circa 45/50 cm; wc e bidet hanno una larghezza di 40/45 cm per una lunghezza di 60 cm e necessitano di uno spazio ai lati che varia dai 15 ai 25 cm.

To ensure comfortable use of the bathroom, some standard measurements have been identified. The washbasin is generally around 60 cm wide and 45-50 cm deep; the toilet and bidet 40-45 cm wide and 60 cm tall, and they require from 15 to 25 cm of space at the sides.

### Meglio un mobile a terra o sospeso?

Floor-standing or wall-mounted unit?

Non esiste una regola fissa, in questo caso la scelta dipende dalle preferenze e dallo spazio a disposizione. Il mobile a terra sfrutta tutti i centimetri disponibili dal pavimento fino al lavabo, mentre la base sospesa è visivamente più leggera e ha un contenimento ridotto.

There is no fixed rule, in this case the decision depends on personal preference and available space. Floor-standing units make the most of all of the available space from the floor to the sink, while wall-mounted units are less aesthetically invasive but have a more contained space inside.

### Quale profondità è più indicata?

What is the recommended depth?

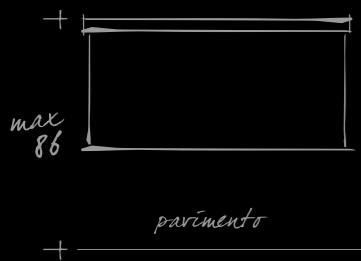

A seconda dello spazio, si può scegliere una profondità che varia dai 38 ai 51 cm. According to the space, depths can vary from 38 to 51 cm.

### Altezza del piano

# LAVABI

Washbasins

## Semincasso

Semi-recessed

I lavabi a semincasso sono installati parzialmente sui piani di appoggio e ottimizzano lo spazio della stanza da bagno. Con questa soluzione, nel caso di arredi dalla profondità ridotta, non è necessario rinunciare ad un lavabo capiente.

Semi-recessed washbasins are partially installed on the surface top and optimise the space in the bathroom. With this solution, you can still have a capacious basin even with reduced depth.

## Soprapiano

Inset

I lavabi per installazione soprapiano sono inseriti parzialmente nel top e il bordo di appoggio viene lasciato a vista per essere abbinato agli altri sanitari o complementi d'arredo. Una soluzione con molteplici possibilità compositive, che assecondano ogni esigenza.

Inset washbasins are partially set in the countertop and the edge is left visible, resting on the surface. This can be matched with other bathroom fittings or furnishings. This solution can be used in multiple possible compositions to suit every need.

## Sottopiano

Undercounter

I lavabi per installazione a sottopiano rappresentano una proposta per l'arredo bagno moderno e minimal. Incastonati interamente nel top, i lavabi sottopiano sono estremamente funzionali e garantiscono una superficie continua, senza bordi.

Washbasins to be mounted under the counter fit in well in a modern, minimalist style bathroom. Fully set in the countertop, undercounter washbasins are extremely functional and guarantee a smooth, even surface with no edges.

## Tutto fuori

Countertop washbasins

I lavabi "tutto fuori" sono appoggiati direttamente sul top e, disponibili in vari modelli e finiture, diventano veri e propri elementi d'arredo e di design. Protagonisti dell'ambiente bagno e di grande tendenza, si adattano a qualsiasi stile.

Countertop washbasins rest directly on the countertop and are available in various different models and finishes. They are real pieces of furniture, as well as being design features. This popular and prominent bathroom feature can be adapted to suit any style.

# Praticità prima di tutto

Practicality comes first

Come deve essere un lavabo? Indubbiamente bello da vedere, ma soprattutto pratico da utilizzare. Di piccole o grandi dimensioni, l'importante è scegliere quello più funzionale alle nostre esigenze. Perché l'ambiente bagno sia un luogo da vivere quotidianamente.

What characteristics should a washbasin have? It should be without a doubt nice to look at, but also practical to use. Whether small or large, the important thing is to choose the one that best fits your needs. So that the bathroom is a space we can live in every day.

## Design e stile

Design and style

**In un ambiente bagno il lavabo è l'elemento d'arredo centrale. Per questo è fondamentale scegliere il design che più si adatta all'arredo: linee morbide o squadrate, forme minimal o originali, stile classico o moderno. Per ogni bagno, il lavabo giusto.**

The washbasin is a focal point in the bathroom. This is why it is so important to choose a design that best suits the furnishings: soft or angular lines, minimalist or traditional shapes, and classic or modern style. The right washbasin, for every bathroom.

## Consolle

Consoles

I top consolle sono comodi e capienti e possono essere appoggiati sulla base.  
È possibile scegliere tra modelli dalle linee morbide o più geometriche, a seconda dello stile e degli spazi dell'ambiente bagno.

Console tops are convenient and capacious and can be rested on the base unit.  
You can choose from models with soft edges or more geometric forms, according to the style and spaces in the bathroom.

# Di grandi dimensioni o salvaspazio

Large or space-saving

I lavabi sono disponibili in varie misure per adattarsi a tutte le tipologie di spazi. Negli ambienti ampi è possibile installare lavabi grandi o optare per una soluzione con doppi lavabi, mentre negli spazi ridotti è consigliabile inserire elementi più piccoli che non penalizzano né la praticità, né il design.

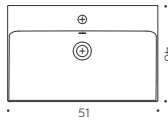

The washbasins are available in various sizes to fit into any space. In expansive spaces, large or double washbasins can be installed, whereas, where space is limited, smaller basins that nonetheless do not compromise on practicality or design can be installed.

# Portare praticità con il lavabo consolle

Bringing practicality with the console sink

Una piccola curva fa incontrare il nuovo lavabo Bob in Mineralguss e il fianco della base: il design racconta l’eleganza.

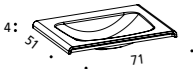

A small curve joins the new Mineralguss Bob wash basin with the base unit side panel: design meets elegance.

# LAVABI

Washbasins

## Integrati

Integrated

Top e lavabo formano un pezzo unico e creano una superficie continua, che può essere appoggiata su una base o fissata direttamente a parete. I lavabi integrati, disponibili in differenti forme e materiali, sono estremamente pratici e versatili.

The countertop and basin form a single, continuous surface which can be positioned on a base unit or mounted directly on the wall. Integrated washbasins, available in different shapes and materials, are extremely practical and versatile.

Attenzione / Note

## Lavabo centrato o decentrato

Centred or off-centre washbasin

Il lavabo posizionato al centro del top è una soluzione convenzionale per l'arredo bagno, che rispetta la simmetria della base. La variante con lavabo decentrato, a destra o a sinistra, dà invece dinamismo alla composizione e lascia libero un comodo piano di appoggio e una pratica zona beauty.

Having the washbasin centred on the countertop is the conventional bathroom furnishing solution, which reflects the symmetry of the base unit. The variant with an off-centre basin, to the left or the right, gives a more dynamic effect to the composition and leaves a handy surface free and creates a practical vanity area.

# Quale materiale scegliere

What material

Al classico lavabo in ceramica lucida o opaca, si affiancano materiali nuovi e innovativi che danno personalità all’arredo bagno: le resine (mineralguss, teknorit, teknoril o tekor) per design e forme particolari; le pietre naturali per effetti tattili e materici, il cristallo trasparente o colorato per superfici brillanti.

In addition to the classic glossy or matt ceramic basin, new and innovative materials can be used which add personality to your bathroom furnishings: resins (mineralguss, teknorit, teknoril and tekor) to create unusual designs and shapes; natural stones to give a tactile, textured effect; and clear or coloured glass to produce gleaming surfaces.

# La multifunzionalità delle specchiere

Multifunctional mirrors

Lo specchio in bagno è un elemento indispensabile, ma le specchiere contenitore sono anche estremamente utili e pratiche, perfette per qualsiasi stile di arredo. Fuori superfici a specchio e dentro tanto spazio per contenere oggetti e accessori da avere sempre a portata di mano.

A mirror in the bathroom is a must, but mirrored wall units are also extremely useful and practical. Perfect for any furnishing style, the external surface is mirrored and inside there is plenty of space for your personal items and accessories, to ensure everything is always to hand.
